

## Chapter 7, Exercise 1

For the following groups of items, specify whether a tab control would be appropriate for organizing the items in each group:

1. Clothing, Sporting Goods, Hardware, Cosmetics, School Supplies **YES**
2. Baseball, Football, Basketball, Hockey, Soccer, Standings, Player Statistics **NO**
3. Cars, Trucks, Boats, Airplanes **YES**
4. Maples, Firs, Pines, Beeches, Walnuts, Oaks, Aspens, Cedars, Spruces, Firs, Lindens, Sycamores, Hickories **NO**

**Second part of assignment on next page...**

## Chapter 8, Exercise 1

There are 20 students available for assigning to five different classes. Using a minimum number of controls, design a Web page that allows the user to assign these students to any of the five classes. The user can unassign students from each class as well as assign them.
